Mechanical Engineer

Job Category: Engineering and Project Engineering
Location: Covington, LA
Status: Full time, employee
Relevant Work Experience: 0-2 years minimum
Education Level: Bachelor's Degree
Salary: Depends on Experience

JOB DESCRIPTION

The Dredging Division of Weeks Marine, Inc. is one of the largest providers of dredging services in the US. It is the only operator of hydraulic, hopper, and clamshell dredges based on the East Coast, and the largest provider of these services in the Gulf Region.

We are seeking a creative and enthusiastic team player for our Engineering Department. This opportunity involves the calculations, design development, developing, reviewing and approving drawing, and project management (of capital projects, retrofits and repairs). The majority of the work is directly related to the support of the Equipment related to Weeks Marine's Dredging Division – Dredges, Boats, Barges and Lifting Equipment.

The desired background for this position includes:

- Individual should have a Marine, Offshore or Heavy Industrial background
- Computer proficient – Solidworks, AutoCAD
- Strong communication skills
- Excellent problem solving, decision-making, and organizational skills
- Capable of adapting to and implementing change
- Self-motivated, able to work alone or with a team

This position requires:

- Degree in Mechanical Engineering or Naval Architecture or Marine Engineering
- Ability to travel to field locations, primarily Gulf and East coast of US

Weeks Marine offers an excellent benefits package, including profit sharing and matching contribution 401k plan.
